

Mouse Monoclonal Antibody to IFN-gamma

Cat. No. SGA20009 **Package Size:** 50ul , 100ul

Product Attribute

Aliases	IFG; IFI
Host/Isotype	Mouse IgG1
Species Reactivity	Human
Formulation	Purified antibody in PBS containing 0.03% sodium azide.
Storage	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze/thaw cycles.
Purification	Purified
Immunogen	Purified recombinant fragment of human IFN- γ expressed in E. Coli.
Noted	For research use only

Applications

Recommended dilution

ELISA	1/10000
WB	
ICC	
IHC	

Description

This gene encodes a soluble cytokine that is a member of the type II interferon class. The encoded protein is secreted by cells of both the innate and adaptive immune systems. The active protein is a homodimer that binds to the interferon gamma receptor which triggers a cellular response to viral and microbial infections. Mutations in this gene are associated with an increased susceptibility to viral, bacterial and parasitic infections and to several autoimmune diseases. [provided by RefSeq, Dec 2015]
